

AREA RADIUS Modular seating
Design: Anya Sebton, 2016

LAMMHULTS

PLAY WITH COLOUR, SHAPE, & FORM

Build the office configuration that works best for any office activity. Create a room within the room. Surround a column. Create a comfortable waiting area or a casual lounge. Then take all apart and make a new office configuration. Area Radius responds with consistent style in diversity.

The Area series modular seating adds to its lively, interesting planning possibilities with the addition of Area Radius, two sets of curved modules – closed radius, in which eight 45 degree modules complete a circle, and open radius, which forms a circle using four 90 degree modules. All Area Radius modules are available in both low and high back versions and can be linked with all Area modules – see separate presentation for Area.

“Functional Identity is the key theme in my work. Design is about combining aesthetic values together with functional and technical needs, to create a unique product.”

— Anya Sebton, Designer
