

ATLAS AIR Chair / Armchair
Design: Johannes Foersom & Peter Hiort-Lorenzen, 2022

LAMMHULTS

COMFORT WITH AN AIRY LIGHTNESS

A careful attention to detail characterizes the Atlas Air chair series. Atlas Air's lightness is not only rooted in design but material composition. A cast, recycled aluminium frame reduces the seat's weight and environmental footprint. The seat is made of wear-resistant mesh, which contributes to the chair's slender, lightweight appearance. Conceived for the circular economy, the new Atlas Air contains no composite materials.

The mesh seat is available in two colours, black or rust brown. There is also a version of Atlas Air with a quilted seat pad in fabric or leather. 5-feet frame is available on glides, always height-adjustable and compatible with casters. To facilitate repair, maintenance, and ultimate recycling, all its components are separable.

“With Atlas Air, we wanted to make a contemporary version of a classic design category.”

— Johannes Foersom & Peter Hiort-Lorenzen, Designers
