

CIAO Table
Design: Gunilla Allard, 2013

LAMMHULTS

AN INTERPLAY OF GEOMETRIC SHAPES

Through its interplay of geometric shapes, the Ciao table manages to balance expressiveness with lightness and crisp elegance. "To me, Ciao is a reductive study in proportions," says designer Gunilla Allard. Ciao's expression is boldly cubist and monochrome. The dimensions are generous, bringing to mind one of Lammhult's iconic furniture pieces of the late 1960s. "It's a nod to Börge Lindau's and Bo Lindekrantz's S70 series," she acknowledges.

Ciao is available in three different heights and 3 different sized round table tops. The monochrome table comes in white, black, light beige, brown, yellow and light blue.
