

CORSO Easy chair
Design: Peter Andersson, 2021

LAMMHULTS

EXPRESSIVE CHARACTER WITH MINIMAL CONSTRUCTION & DESIGN

The Corso easy chair started as a play with lines in the sketchbook of designer, Peter Andersson: "The two-dimensional lines in the sketchbook, which intuitively just felt so obvious, have been translated into a cohesive loop of steel tubing" Peter Andersson explains. The simplicity of Corso's design is also reflected through its resource-efficient construction. The frame gives the easy chair a soft, resilient effect both through its shape and construction, whilst the design also utilizes a minimal amount of upholstery, without compromising on comfort. Natural and durable materials are used to prolong the product lifecycle and is easily taken apart for replacement or recycling.

Corso is available in black or natural color options for canvas or leather upholstery as standard, and the steel frame is available as powder coated or chromium plated.

**“The two-dimensional lines
in the sketchbook, which
intuitively just felt so obvious,
have been translated into a
cohesive loop of steel tubing”**

— Peter Andersson, Designer
