

**SUNNY** Modular seating  
Design: Note & Gunilla Allard, 2021

**LAMMHULTS**

## A MODULAR COMFORTABLE SEATING SOLUTION FULL OF PERSONALITY

A careful attention to detail characterizes the Atlas Air chair series. Atlas Air's lightness is not only rooted in design but material composition. A cast, recycled aluminium frame reduces the seat's weight and environmental footprint. The seat is made of wear-resistant mesh, which contributes to the chair's slender, lightweight appearance. Conceived for the circular economy, the new Atlas Air contains no composite materials.

The mesh seat is available in four colours, white, grey, black or rust brown. There is also a version of Atlas Air with a quilted seat pad in fabric or leather. Both a 4-feet and a 5-feet frame on glides are available, the 5-feet is always height-adjustable and can also be combined with casters. To facilitate repair, maintenance, and ultimate recycling, all its components are separable.

**“The task was to make soft, lounge seating - a little lower, a little softer, a little more relaxed, a little cooler, a little dreamier and a cross-border between public and private.”**

**— Note (design studio) &  
Gunilla Allard, Designers**
